

The **Technology and Business Cooperation Event** is held in Valencia (Spain) during **EGÉTICA-EXPOENERGÉTICA**, the International Fair for Energy Efficiency and New Technological Solutions for Renewable and Conventional Energy (25th to 27th November 2009).

EGÉTICA – EXPOENERGÉTICA is an international platform to allow companies and other organisations from the energy sector to meet each other in order to share innovative technology proposals, seek solutions for technological challenges and start business cooperation.

Two complementary activities are organised for this purpose:

- **Conferences** by Spanish and European companies about their most innovative technologies.

- **Bilateral meetings** between entities with common interests, aimed at establishing a first contact for future collaborations.

Areas of Interest

The event focuses on innovations in process technology and products from the following sectors, each one covering many areas:

- Sustainable production and distribution: Bio fuels, bio mass, solar and thermal energy, ...
- New technological Solutions (energy and environment): Efficiency, impact, clean production, ...
- Efficiency in construction: Insulation, materials, renewable energies, bioclimatic, ...
- Efficiency in transport and sustainable mobility: Hybrid, electrical, hydrogen, ...

Participants

The event is addressed to all European companies, universities, technology centres, research institutes or any entity offering innovations in the energy field, seeking partners to solve technology problems, to start a research project or to establish business cooperation.

Registration

To participate in the event please register and insert your profile at:
